

## Why A2P messaging?

Whether you aim to win back customers, drive more traffic, or enhance user engagement & experience, effective communication is essential. E-mail isn't enough as users are statistically **not checking** their inboxes too often. But everybody **checks their phones** every 12 minutes. With our strategic approach, we ensure your message lands right on target screens.

### Pick

Push

Social Media

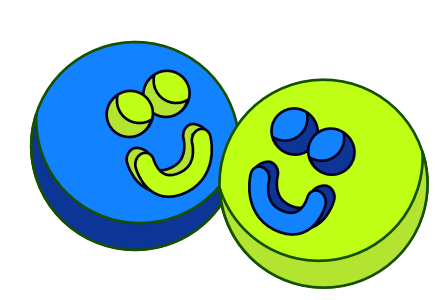

Flashing call

### Adapt to your needs

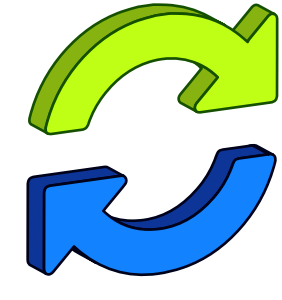

- ✓ Integrate our services with or without CRM: just a spreadsheet can be enough
- ✓ Communicate using your logo or short number to gain trust and recognition
- ✓ Set 2-way communication with your customers to know them better
- ✓ Brush-up your list with HLR: you won't message invalid numbers & save money
- ✓ Implement message cascade to send via the cheapest channels first
- ✓ Manage traffic with SMS firewall: prevent fraud and assure compliance

## How does it work

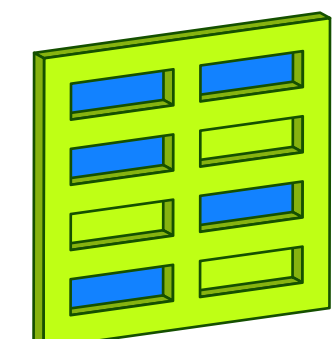

Contact us

We will connect you to your account manager

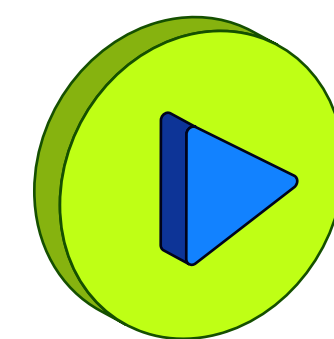

Exchange data

Such as volumes, markets, content & contract conditions

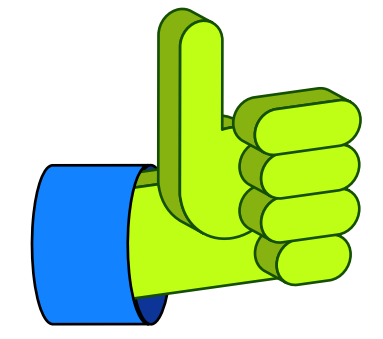

Create account

We keep all data safe & apply limited time availability for traffic data

Start sending

We take care of compliance, security, testing & analytics
